Re: WT Docket 11-65

Dear Chairman Genachowski and Commissioners:

I write to you today in support of the AT&T and T-Mobile merger. As the CEO of Nevada Motor Transport Association, I feel it is important to support efforts like this merger that will positively impact our state by bringing mobile broadband solutions to a significant swath of our rural area and increasing the opportunities for the Nevada trucking industry to reshape their business operations and support Nevada's economic growth.

We applaud the economic investment plans made by AT&T to unfold its mobile broadband networks across our state. Having 4G LTE speeds will allow increased mobility as users are able to use their phones or mobile devices on the go in more and better ways. This will be an incredible advantage to those in rural Nevada.

Enhanced connectivity will allow more access to transportation applications which can now be used in smaller towns across Nevada, providing availability of detailed information to customers and competitors on goods, services and prices. It can also enable enhanced efficiencies in transportation activities. Industry instructors can expand their educational resources and tools, truckers can utilize wireless solutions across far reaching areas, and small businesses can compete on a larger scale due to the increased connectivity this transaction affords.

The benefits and opportunities this merger will bring are numerous and promise to have significant impact on our industry and economy across the state. We respectfully ask for your consideration in approving this merger as a way to benefit all of Nevada businesses.

Sincerely,

Paul Enos
CEO
Nevada Motor Transport Association
